

NEXAPLAY

Online Gaming Website

Asset Document & Project Brief

1. Project Context

Client: NexaPlay (Gaming Startup)

NexaPlay is a browser-based online gaming platform targeting casual and mid-core gamers aged 16 to 35. The platform allows users to discover and play games, register accounts, track scores, and compete on leaderboards. The client requires a complete UI design for the platform.

2. Pages to Design

Homepage

Navigation bar, hero banner with Play Now button, featured games grid (6+ cards), genre filter row (5+ tags), and footer.

Game Catalog Page

Grid of 12+ game cards (thumbnail, title, genre, star rating), filter bar (Genre/Rating/Popularity), and search bar.

Game Detail Page

Game title heading, large preview image, 3+ line description, Play Now button, star rating, comments section with 2+ placeholder comments.

User Registration Page

Form fields: Username, Email, Password, Confirm Password, Date of Birth. Create Account button. Link to Login.

User Login Page

Form fields: Email, Password. Log In button. Forgot Password link. Link to Sign Up.

User Profile and Dashboard

Avatar, username, join date. Stats section (Games Played, Total Score, Rank). Recent Games (3+). Achievements (3+ badges).

Leaderboard Page

Table with columns: Rank, Username, Game Title, Score, Date. 10+ rows. Filter dropdown by game.

3. Technical Specifications

Specification	Requirement
Design Tool	Figma (.fig) or Adobe XD (.xd). Editable source file must be delivered.
Desktop Canvas Width	1440px for all pages.
Mobile Canvas Width	375px for Homepage and Game Catalog Page only.
Color Theme	Dark background (hex #0D0D0D or similar). At least one vibrant accent color
Heading Font	Bold sans-serif (e.g., Rajdhani, Exo 2, or Orbitron).
Body Font	Clean readable font (e.g., Inter, Roboto, or Open Sans).
Button States	All buttons must show a default state and a hover state.
Card States	All game cards must show a default state and a hover state.

4. Deliverables

- One editable source file in Figma (.fig) or Adobe XD (.xd) containing all 7 pages.
- 7 desktop PNG exports (1440px): homepage.png, catalog.png, game_detail.png, register.png, login.png, profile.png, leaderboard.png.
- 2 mobile PNG exports (375px): homepage_mobile.png, catalog_mobile.png.
- A style guide page inside the source file showing: color swatches with hex codes, heading font name and sizes (H1/H2/H3), body font name and size, button styles (default and hover), game card component (default and hover).

5. Out of Scope

- Backend development or server-side logic.
- Database design or integration.
- Actual game development or embedding of playable games.
- Payment gateway or subscription system design.
- Design of any pages not listed in Section 2.
- SEO or accessibility audit.

6. Acceptance Gates

- All 7 page designs are present in the editable source file.
 - All 9 PNG exports are present with the exact file names listed in Section 4.
 - The style guide page is present in the source file.
 - The source file opens without errors in Figma or Adobe XD.
 - Dark background color is applied across all pages.
 - Every page includes a consistent navigation bar matching the Homepage description.
 - The "Play Now" button is present on both the Homepage hero section and the Game Detail page.
 - The Leaderboard table contains all five required columns: Rank, Username, Game Title, Score, and Date.
-
